

Legal Statement for Assessment of EUDR compliant for agriculture plot : PIN w1wr55kp9f

Level		Explanation
1	High Risk	high deforestation risk – The agricultural plot overlaps both the official Thai National Forest boundary and the GFC2020 forest area, indicating strong likelihood of non-compliance with EUDR zero-deforestation criteria. Further legal and ground-based verification is required.
2	Potential Risk	The agricultural plot partially overlaps with forest area as identified by GFC2020, but is outside official Thai National Forest boundaries. This may indicate forest clearance after the EUDR cut-off date (31 December 2020). Ground verification and land-use history are required to confirm compliance.
3	Compliant	The agricultural plot is located outside both the GFC2020 forest extent and Thai National Forest boundaries, and is therefore not considered deforested land under EUDR requirements. The plot is deemed compliant with the EUDR zero-deforestation cut-off date (31 December 2020), pending confirmation of land use history.

This certification is issued by the best knowledge under collaboration among Thai government agencies:-

1. สำนักงานคณะกรรมการนโยบายที่ดินแห่งชาติ Office of the National Land Policy Board (NLB)
2. สำนักงานการปฏิรูปที่ดินเพื่อเกษตรกรรม (อังกฤษ: Agricultural Land Reform Office: ALRO)
3. กรมส่งเสริมการเกษตร (Department of Agriculture Extension : DOAE)
4. การยางแห่งประเทศไทย (Rubber Authority of Thailand : RAOT)
5. กรมที่ดิน ( Department of Land : DOL )
